SELECTED IMPACT

- ~50% improvement in grid rendering performance
- ~30% reduction in frontend bundle size
- Technical leadership of 3-4 engineers; mentoring and code reviews
- AI-powered dashboard and chart generation POC

TECHNICAL EXPERTISE

Languages – TypeScript • JavaScript (ES6+) • HTML5 • CSS3 • SCSS

Frameworks & Libraries – Angular • React • Next.js • Node.js • RxJS • Redux • Tailwind CSS • AG Grid • AG Charts • Ignite UI

Enterprise Architecture – Micro Frontends • REST APIs • Performance Engineering • Design Systems • Accessibility (WCAG 2.2) • Internationalization (i18n) • Cross-browser Compatibility • CI/CD

Cloud & DevOps – AWS (S3, EC2, Lambda, SQS, SNS, RDS, CloudWatch) • Docker • GitLab • GitHub • Jenkins • OpenShift

Tools – VS Code • Postman • Jira • Kibana • Grafana • Bitbucket • TeamCity • Trello • Redmine

Leadership – Technical Leadership • Code Reviews • Mentoring • Solution Design • Agile Delivery • Stakeholder Collaboration

AI – Prompt Engineering • AI-assisted Development • Natural Language UI • Model Context Protocol (MCP) • GitLab Duo

PROFESSIONAL EXPERIENCE

Iris Software Inc.

Frontend Technical Lead

Barclays Bank PLC – One Risk Portal (Risk, Finance & Treasury)

Apr 2025 – Present

- Owned frontend development of the Risk Desktop Core module.
- Built enterprise micro frontends using Angular and Ignite UI.
- Developed high-performance dashboards using AG Grid and AG Charts.
- Improved grid rendering performance by ~50% using virtualization, lazy loading and pagination.
- Reduced frontend bundle size by ~30% through optimization techniques.
- Contributed to frontend architecture and technology decisions.
- Developed an AI proof of concept that generated enterprise grid and chart widgets from natural language prompts, accelerating dashboard creation for risk managers.
- Technologies: Angular, Ignite UI, AG Grid, AG Charts, GitLab, GitLab Duo.

JPMorgan Chase & Co.

Senior Frontend Engineer

Enablement, ORxE - (Enablement, Online Points Redemption)

Sept 2021 – Apr 2025

- Designed and delivered enterprise Angular applications for customer-facing rewards and enablement platforms.
- Migrated legacy Backbone.js modules to Angular.
- Built accessible applications compliant with WCAG 2.2 standards.
- Integrated AWS services and followed TDD practices.
- Mentored engineers and conducted code reviews for a team of 5.
- Contributed to solution design and UI architecture discussions.

- Designed reusable Angular components and shared UI patterns to improve consistency across applications.
- Technologies: Angular, TypeScript, AWS, Jenkins, Kibana, Grafana, HTML5, CSS3.

Cognizant Technology Solutions

Senior Frontend Engineer

Clients: Credit Suisse & Barclays

Jun 2019 – Sept 2021

- Delivered enterprise Angular and React applications for online banking and self-service platforms.
- Built responsive, user-centric interfaces following Credit Suisse and Barclays UI/UX standards.
- Implemented multilingual support using i18n, Extract-i18n and NGX-Translate.
- Owned frontend delivery for key banking applications serving enterprise users.
- Implemented Docker and OpenShift deployment setup for enterprise applications.
- Collaborated with globally distributed teams following Agile development practices.
- Technologies: Angular, React, Node.js, TypeScript, Docker, OpenShift, Express.js, NGX-Translate, Extract-i18n, HTML5, CSS3.

Zensar Technologies Pvt. Ltd.(Pune)

Frontend Engineer

Clients: Derivco & Internal Products

Jun 2017 – Jan 2019

- Developed and maintained browser-based gaming applications supporting multiple languages and markets.
- Quickly adapted to new JavaScript frameworks and delivered features for business-critical releases.
- Mentored new team members and supported knowledge sharing across the team.
- Designed and developed an internal analytics tool for defect reporting and project tracking.
- Technologies: JavaScript (ES6), Angular, React, Node.js, Express.js, RxJS, Phaser CE, MongoDB.

Cuelogic Technologies Pvt. Ltd.(Pune)

Software Engineer

Clients: Kantar Media, SureScore & Books That Grow

Jul 2015 – May 2017

- Developed full-stack MEAN applications for media and education platforms.
- Built reusable frontend components and integrated REST APIs.
- Delivered end-to-end frontend modules with focus on usability and maintainability.
- Collaborated closely with cross-functional teams in an Agile environment.
- Technologies: AngularJS, Angular, Node.js, Express.js, MongoDB, REST APIs, Bootstrap, HTML5, CSS3.

AWARDS

- Outstanding Performer Award
- Team Star Performer Award

CERTIFICATIONS

- Generative AI for Software Development
- Prompt Engineering (Coursera)
- Scaled Agile
- Model Context Protocol (MCP) – In Progress

EDUCATION

Bachelor of Engineering (Computer Science)

Sant Gadge Baba Amravati University | 2010–2014 | CGPA: 7.0
